

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1 **Claim 1** (Currently amended) : A foldable mobile
2 communication terminal comprising:

3 an upper case including a control processing section,
4 a display, a RF communication section, an I/O section and
5 a vibrator section of which ~~a function block~~ is
6 corresponding function blocks are mounted on a hard board
7 ~~are arranged~~; and

8 a lower case including a key operation section and a
9 battery of which ~~a function block is~~ corresponding function
10 blocks are mounted on ~~the~~ a key board.

1 **Claim 2** (Currently amended) : A foldable mobile
2 communication terminal according to claim 1,

3 wherein the display arranged and accommodated in the
4 upper case comprises a liquid crystal display,

5 wherein a menu selecting section for selecting a menu
6 by navigating through ~~the~~ a menu system displayed on the
7 display is disposed in the vicinity of a lower side of the
8 display.

1 **Claim 3** (Currently amended): A foldable mobile
2 communication terminal according to claim 1,
3 wherein the key board arranged and accommodated in the
4 lower case is a flexible board,
5 wherein said the flexible board ~~is shared its use with~~
6 ~~the shares its use as a~~ connecting board for connecting the
7 upper case and the lower case.

1 **Claim 4** (Currently amended): A foldable mobile
2 communication terminal according to claim ~~‡~~ 3, wherein a
3 battery terminal, a microphone, a key diaphragm, and a LED
4 for keys are all mounted on ~~the same portions of one~~
5 surface of the flexible board and said portions are folded
6 or turned down before storing in the lower case.

1 **Claim 5** (Currently amended): A foldable mobile
2 communication terminal according to claim 1, wherein ~~the a~~
3 microphone section is mounted in an inclined state on ~~the~~
4 a lower side of the lower case at ~~the a~~ position close to
5 ~~the a speaker's~~ mouth so as to receive ~~the a~~ sound from the
6 speaker directly while in use.

1 **Claim 6** (Currently amended): A foldable mobile
2 communication terminal according to claim 1, wherein a view

1 port is provided on the lower case whereby ~~the~~ displayed
2 contents on the display can be seen in ~~the~~ a folded state.

1 **Claim 7** (Currently amended): A foldable mobile
2 communication terminal according to claim 6, wherein the
3 view port is disposed between the microphone and the key
4 operation section.

1 **Claim 8** (Original): A foldable mobile communication
2 terminal according to claim 6 or claim 7, wherein a
3 transparent plate is mounted on the view port.

AS

1 **Claim 9** (Original): A foldable mobile communication
2 terminal according to claim 8, wherein the transparent
3 plate is given a lens function.

1 **Claim 10** (Currently amended): A foldable
2 communication terminal according to claim 1, wherein ~~the~~ a
3 portion of the upper case and the lower case in the
4 vicinity of ~~the~~ portion a section being mechanically
5 connected with respect to each other is formed in a
6 narrower configuration than ~~the~~ a remaining portion.

7

1 **Claim 11** (Currently amended): A foldable mobile
2 communication terminal comprising:

3 an upper case including a control processing section,
4 a display, and ~~the a~~ RF communication section of which ~~the~~
5 corresponding function blocks are mounted on the hard
6 board; and

7 a lower case including a key operation section, ~~the a~~
8 I/O connector, ~~the and a~~ vibrator and the battery of which
9 the corresponding function blocks are mounted on ~~the a~~ key
10 board.

AC

1 **Claim 12** (Currently amended): A foldable mobile
2 communication terminal according to claim 11,

3 wherein ~~the a~~ flexible board is used as the key board
4 arranged and accommodated in the lower case,

5 wherein the flexible board is ~~shared its use with~~
6 shares its use as a connecting board connecting the
7 upper case and the lower case.

1 **Claim 13** (Currently amended): A foldable mobile
2 communication terminal according to claim 11, wherein ~~the~~
3 components such as ~~the a~~ battery terminal, the vibrator,
4 the ~~a~~ microphone, ~~the a~~ buzzer, ~~the a~~ key diaphragm, and
5 the a LED for keys are all mounted on ~~the a~~ same surface of

6 the flexible board and folded or turned down before storing
7 in the lower case.

Claim 14 (Currently amended): A foldable mobile communication terminal according to claim 11, wherein the a portion of the upper case and the lower case near the portion a section being mechanically connected with respect to each other formed in a narrower configuration than the a remaining portion.

AB

Claim 15 (new): A foldable mobile communication terminal comprising:

an upper case and a lower case which is hinged to the upper case;

said upper case including a control processing section, a display, a RF communication section, an I/O section and a vibrator section which are arranged and accommodated in said upper case, and a hard board which is arranged in said upper case, wherein corresponding function blocks of the control processing section, the display, the RF communication section, the I/O section and the vibrator section are mounted on said hard board; and

said lower case including a key operation section and a battery which are arranged and accommodated in said lower

case, and a key board which is arranged in said lower case, wherein corresponding function blocks of the key operation section and the battery are mounted on the key board.

AC

Claim 16 (New): A foldable mobile communication terminal according to claim 15, wherein the key board is a flexible board, wherein a portion of said flexible board which is located at the hinge portion of the upper and lower case is used as a connecting a connecting board for connecting the upper case and the lower case.

Claim 17 (New): A foldable mobile communication terminal comprising:

an upper case and a lower case which is hinged to the upper case; said upper case including a control processing section, a display, and a RF communication section which are arranged and accommodated in said upper case, and a hard board which is arranged in said upper case, wherein corresponding function blocks of the control processing section, the display, and the RF communication section are mounted on said hard board; and

said lower case including a key operation section, a I/O connector, a vibrator, and a battery which are arranged and accommodated in said lower case, and a key board which is arranged in said lower case, wherein corresponding function blocks of the key operation section, the I/O connector, the vibrator, and the battery are mounted on the key board.

AG

Claim 18 (New): A foldable mobile communication terminal according to claim 17,

 wherein the key board is a flexible board,
 wherein a portion of said flexible board which is located at the hinge portion of the upper and lower case is used as a connecting a connecting board for connecting the upper case and the lower case.
